To Whom It May Concern:

Since the early 1960's, Richards Transport has been providing transportation services to our firm. They have been our primary carrier largely based on their logistics, large truck horsepower, trailer inventory as well as their expertise in heavy oversize loads. We are of the opinion that their willingness to expand and obtain the right equipment and properly trained personnel has led to their success.

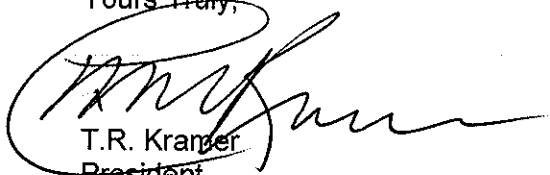

They have a wide range of truck and trailer combinations to service our transportation requirements. Our loads range from skid steer and fork trucks to large mining trucks in excess of 100 ton carrying capacity. Kramer, Saskatchewan's Caterpillar dealer since 1944, imports new equipment from various locations throughout the United States, Europe and Asia. We utilize Richards to provide freight capabilities both to and from these locations to Saskatchewan for sale to our customer's. As well, our used equipment division exports throughout the world through using ports in Canada and the United States. Richards transport has been instrumental in helping us accomplish these shipments.

A recent project illustrates their attention to detail, concern for safety and quality. Involved was the movement of a Caterpillar 992 wheel type loader from the Kramer yard in Estevan to our head office in Regina for overhaul. The loader was placed on a 13 axle trailer with a payload of 145,000 pounds.

We are pleased to hear of their recent acquisition of a new Aspen multi-lane heavy haul trailer. It is our understanding that this trailer is capable of payloads of up to 288,000 pounds. We will now be able to move such machines as a Caterpillar 793 Rock truck without the removal of the axle assemblies. This will be a significant savings for our customers when it comes to repairing large mining equipment. The more weight a trailer can haul the fewer number of components we need to remove in order to make the load legal. We also benefit by not hiring a second truck to haul removed components.

Please consider Richards Transport Ltd., for your transportation needs. Kramer will continue to use this firm for our heavy hauling needs.

Yours Truly,

T.R. Kramer
President
Kramer Ltd.

RECOMMENDATION

Acting as agent for Consumers Cooperative Refinery in Regina Saskatchewan, in my capacity as Material Manager for Colt WorleyParsons, it has been my abject pleasure to have worked with all the staff at Richards Transport during our lengthy association.

We entered our relationship with some very demanding requirements in what had been a slowed local economy ; but Richards quickly showed us they could excel at any task before them. Time and again they would surprise and impress , so much so that other WorleyParsons offices across the country began contacting Richards's dispatch.

One example of that expertise was a large Heater section shipped from Tulsa ,Oklahoma that required 75' of deck space (at the last moment of a tight schedule) Richards was able to reconfigure and reroute and deliver as promised.

I would not hesitate to recommend this company in any circles , and look forward to inviting them to work on my next challenge.

Regards;

Greg S.Smith

Material Manager

To Whom It May Concern

LETTER OF RECOMMENDATION

We have no hesitancy whatsoever in recommending Richards Transport Ltd. for the transport of material and equipment throughout Canada and the United States. Richards Transport Ltd. has completed a wide range of transportation needs for CCRL. Our experience with Richards Transport Ltd. has covered a time span of more than 50 years, and the work has always been completed on schedule and in a cost effective manner.

We would recommend Richards Transport Ltd. as a transportation company for any of your transportation requirements.

Regards,

A handwritten signature in cursive script that reads "Al Thompson".
